Game Features

Tumble Mechanics

Tumble Mechanics are available in both the base game and the bonus game! Any symbols that are part of a winning cluster will be removed and the empty positions are filled with symbols falling from above. Any new wins will be added to the existing win. Tumbling ends when there are no new winning clusters.

Burning Wilds

Any successful cluster win will tumble in 1 Burning Wild symbol on the grid, which will be placed in a random column on top of the remaining symbols. In both the base game and Bonus Game, the multiplier meter starts from one. Any Burning Wild symbols involved in a cluster win pattern will boost the current multiplier meter by one. Any win in the current spin will be multiplied by the current accumulated multiplier value. The multiplier meter will remain at the accumulated value until the end of the spin and resets between every spin in the base game.

Wild Fire

In the base game only, successfully filling the meter gauge will activate the Wild Fire feature. 4 Burning Wild symbols will be placed in random symbol positions on the reels, except on existing Bonus Scatter and Wild symbols.

Meter

During the base game, every winning tumble will increment the meter gauge by one. 18 winning tumbles will fulfil the meter gauge. The meter gauge is only active in the base game, and it resets to zero after it's been fulfilled and has triggered the Wild Fire feature. The meter gauge is stored per specific bet option. There is no meter during Free spins.

Free Spins Bonus

3 Bonus Scatter symbols in a single spin will award 10 Free Spins.
4 Bonus Scatter symbols in a single spin will award 14 Free Spins.
5 Bonus Scatter symbols in a single spin will award 18 Free Spins.
During the Bonus Game:
Any winning tumble will increase the current game multiplier by 1.
The multiplier starts from 1 and stays persistent throughout the Bonus Game.
Any Burning Wild symbol involved in a win will also increment the game multiplier by 1.
The winnings of the symbol clusters are multiplied by the accumulated multiplier value. The accumulated multiplier value resets at the end of the Bonus Game.
Any Bonus symbol landing during the Bonus Game will add one more free spin to the remaining number of free spins.

Buy Feature

By paying 80x bet, you can buy instant entry to The Bonus Game! The Buy Feature can only be activated in the base game. The Free Spins bought in the bonus game will be triggered by 3-5 random Bonus Scatter symbols.
