

GHOST GLYPH

GHOST GLYPH

Just in time for Halloween, we welcome you to an old haunted house. Hidden underneath the grounds ghosts have a life of their own, each with its own unique ability, quirkiness and characteristics. Ghost Glyph is a 7x7, cluster-pay slot with tons of exciting features.

It's well-balanced with medium volatility, a 33% hit rate in the base game and you can win up to 2000 x. The charming poltergeists are just the cherry on the top! Expect a spooky gaming experience with a splash of colour.

QUICKSPIN

Game Features

Tumble Mechanics

Tumble Mechanics are available in both the base game and Bonus Game. Any symbols that are part of a winning cluster are removed. The empty positions are filled with symbols falling from above. Any new wins are added to the existing win. Tumbling ends when there are no new winning clusters.

The Ghost Glyph

The Ghost Glyph is available in both the Base Game and the Freespins Bonus. After the removal of winning symbol clusters and prior to tumbling, a Ghost Glyph is awarded in one of the empty spaces. At most one Ghost Glyph is awarded for each tumble. A Ghost Glyph is evaluated and removed as a Wild. For each Ghost Glyph removed, an additional Ghost Urn is activated. If the Blue Ghost Urn is activated, all unused Ghost Glyphs are turned into Wild. No additional Ghost Glyphs will be awarded during the remaining tumbles of that spin.

Urn Features

Before each spin, 5 Ghost Urns are randomly determined with the final Ghost Urn always being the Blue Ghost Urn. Each of the first 4 Ghost Urns is chosen randomly from among Yellow, Green and Red Ghost Urns. Ghost Urns are activated from left to right for each Ghost Glyph consumed as part of a win. When there is a non-winning screen, activated Ghost Urns are awarded in the order they were activated.

Yellow Ghost Urn

Spreads Wilds on the reels! This feature spawns 4-10 randomly placed Wilds in the game area.

Green Ghost Urn

Transforms low paying symbols! This feature targets one randomly selected low paying symbol and transform all occurrences of that symbol in the game area to another low paying symbol type.

Red Ghost Urn

Removes low paying symbols! feature targets one randomly selected low paying symbol and removes all occurrences of that symbol in the game area

Blue Ghost Urn

Activates the bonus game! Or awards 3+ freespins in the bonus game.

Massive Wild Feature

The Massive Wild feature is activated at the end of the free spin if the Paranormality Meter reaches Level 1 or higher. If the Paranormality Meter reaches less than Level 3, Massive Wild symbols are removed when part of a win. The Massive Wild Feature has 22 levels.
