Travel to ancient Greece and immerse yourself in a high-end drama straight out of Greek mythology with Titan Thunder: Wrath of Hades.

Game Features

Lightning Jackpots feature

When you get 6 or more scattered Money symbols, it triggers the Lightning Jackpots feature with 3 initial respins. All Money symbols that triggered the Lightning Jackpots feature are held in position and all other positions turn into individual spinning reels.

With each spin, the Money symbol displays a random prize value, a Minor Jackpot, or a Major Jackpot award. Possible random Money symbol prize values are: 1x, 2x, 3x, 4x, 5x, 6x, 8x, 10x, and 14x triggering bet.

If one or more additional Money symbols land on the reels, they're held in position and the number of remaining respins is reset to 3.

The Lightning Jackpots feature ends when there are no respins left, or when all 15 Money symbols are held. When 15 Money symbols appear on the reels, the Mega Jackpot is awarded!

Money symbol awards are paid in addition to any Jackpot won. The currency of the Jackpots corresponds with the currency of the player's account. The Lightning Jackpots feature is available in both the base game and the Underworld Free Spins bonus.

Underworld Free Spins Bonus

When you get 3 Scatter symbols, it will trigger the Underworld Free Spins bonus with 8 initial spins.

Retrigger

During Free Spins, 3 Scatter symbols will add 8 additional free spins to the amount of remaining free spins. The current multiplier for all wins increases by 1x.

Bonus Buy feature

You can buy instant entry to the Underworld Free Spins bonus for 40x bet! The Bonus Buy feature may not be available in all markets.
