Game Features

Tumble Mechanics

This game boasts tumble mechanics with cluster wins! The tumble mechanics are available in both the base game and the bonus game.

Any symbols that are part of a winning cluster will be removed, and the empty positions will be filled with symbols falling from above. Any new wins will be added to the existing win. The tumbling ends when there are no new winning clusters.

Burning Arrows feature

The Burning Arrows feature is available in the base game. Once a winning cluster is removed from the reels, there's a chance that a multiplier will be created in the empty symbol positions. The multiplier will remain under the symbols until it's revealed by a win in a later tumble sequence.

If a winning symbol cluster is removed and reveals one or more multipliers from a previous win, the revealed multipliers will be accumulated until the end of the spin.

Any win in the current spin will be multiplied by the accumulated multiplier value. The accumulated multiplier value resets between every spin.

Flames of Nero

If you get 3 or more Bonus Scatter symbols in a single spin, it will start the Flames of Nero free spins bonus!

3 Bonus Scatter symbols in a single spin will award 10 free spins.

4 Bonus Scatter symbols in a single spin will award 12 free spins.

5 Bonus Scatter symbols in a single spin will award 14 free spins.

During the Flames of Nero bonus game:

Multipliers will be placed under randomly selected symbols in every free spin. Multipliers revealed under a winning cluster will accumulate throughout the bonus game. The winnings of the symbol clusters will be multiplied by the accumulated multiplier value. The accumulated multiplier value resets at the end of the bonus game.
