Game Features

Tumbling Reels

Any symbols that are a part of a winning cluster will be removed from the play area and the empty positions fill up with new symbols. Any tumble wins will be added to the existing win. The tumbling ends when there are no new winning clusters.

Power Glyph

The Power Glyph feature is available in both the base game and the Golden Free Spins Bonus. If there are winning clusters, a Power Glyph will be awarded in one of the winning locations. When a Power Glyph is removed, the next Power-Up is activated.

Power-Up feature

Each spin has 7 Power-Ups! In the base game, the last Power-Up is always a Gigantic Wild, and in the Golden Free Spins Bonus, it's always a Golden Glyph. The first 6 Power-Ups are random Golden Scarabs or the 6 Patterns of Horus. The next activated Power-Up is awarded when there are no more winning clusters.

Gigantic Wild Power-Up

The Gigantic Wild Power-Up awards a Gigantic Wild in the play area.

Golden Glyph Power-Up

The Golden Glyph awards a Golden Glyph Wild, up to a total of 4. The Golden Glyph awards an extra spin instead if there are 4 Golden Glyph Wilds already.

Golden Scarab Power-Up

The Golden Scarab spawns 4-10 Wilds in the play area.

Patterns of Horus Power-Up

The Patterns of Horus removes symbols in a pattern. These patterns are: Cross, Ankh, Bird, Eye, Hourglass, and Snake.

Golden Free Spins Bonus

If there are 3 Bonus Scatters in the base game, 7 free spins will be awarded! Inside the Free Spins Bonus, 3 Bonus Scatters awards 5 additional free spins. A Golden Glyph Wild is awarded in the first spin, and it stays for the duration of the free spins, but it also moves randomly to another location between each free spin.

Buy Feature

Golden Glyph 2 also includes a Bonus Buy feature – pay to get instant entry to the Free Spins Bonus!

The Buy Feature can be activated from the base game. By paying and betting, you can buy entry into the Golden Free Spins Bonus with 1, 2, or 3 Golden Glyph Wilds. The theoretical payout of the above Buy Feature is 96,30%, 96,49%, and 96,60% respectively.

The Buy Feature may not be available in all markets.
